### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: applicant recites a remotely operated manhole cover for a railroad tanker. The device is comprised of a hollow neck having a side wall defining an opening and a locking member operatively mounted to the side wall to be movable between a locked position and an unlocked position. A cover is pivotably mounted and is movable between open and closed positions. The cover closes the hollow neck and has a radially extending locking flange positioned on the cover to be aligned with the locking member when the cover is closed. The device is further comprised of a cover actuator and a locking actuator connected to the cover and the lock, respectively and move the respective actuators between the open and closed positions, or locked and unlocked positions. A cover activator and lock activator are connected to the above mentioned actuators and when energized, the activators, operate the actuators. The device is further comprised of a controller in communication with the cover and lock activators and in receiving communication from the cover and lock actuators. The controller energizes the cover activator separately from the lock activator, and energizes the two activators in sequence. The controller will first energize the lock activator which in turn will operate the lock actuator to unlock the cover and then energize the cover actuator to open the cover. The controller will then reverse the energizing order to close and lock the cover. The controller is supplied with lights informing the user that the cover is either open or closed and the lock is either locked or unlocked.

The prior art, taken singularly or in combination, does not adequately disclose the features recited in the instant claims. Specifically, the prior art does not disclose activators and actuators, operating the lock and cover in a separate and sequential nature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert J. McCarry, Jr. whose telephone number is (571) 272-6683. The examiner can normally be reached on Monday through Friday 7:00am to 3:00pm.
